Rep. Floren: Letter to the Editor Regarding Climate Change

By Livvy R. Floren

It may be inconvenient, but the truth is: The earth is running a fever. And it cannot be cured by taking two aspirin and calling the doctor in the morning.

The climate crisis is for real. It has been brought on by population growth, technological advancement and a total lack of political accountability. Nature's cycles are profoundly changing- the temperatures of the earth's atmosphere and oceans are rising. Greenhouse gases- especially carbon dioxide- are causing environmental shifts never before experienced.

“Stepping Up” to speak out about these issues and trying to find solutions are essential. Thank you to the students, faculty and staff of Greenwich Country Day School for organizing the April 14th town-wide rally and for working to preserve and protect a clean planet.

There is only one earth.... And we are all on it together.

Livvy R. Floren
State Representative 149th District (Greenwich and Stamford)
